Syn:- To appreciate; value; appraise; prize; rate; estecm; comt; calculate ; uumber. - To EstiMATE, ESment. Estimate has reference especially to the external mefations of things, such as amount, magnitude, importance, dc. It usually involves compntation or calculation, as, to estimate the loss or gain of an enterprise
Bsteem has reference to the truo character or standini n thing, to its intrinsic value or merits. Thus, we csteen it anl honor to be indabitants of a rree country. When thus applied to things, it nearly coincides with consider: ditferiut from the latter only as implying that we value the thing in question. When applied to persons, esteen is used in a moral sense, and implies a mingled sentiment of respect and attachment. Thus, we esteem a man for his miform iutcgrity; wo esteem a hawyer for hus candor
and titirncss; we estem a magistrate for his devotion to athe public good. See APPRECLITE. Es'fi-mmie (45), n2. [Lat. estimatum, from astimare;

Syn. - Pardon: remission. - Forion Porgiveness is Anglo-Saxon, and pardon Norman French, both denoting to wive back. The word pardon being early used in our Bible, has, in religions matters, the same sense as forgivemess: ont in the language of we offen tind between corresponding Anglo-sarion and Norman words. Forgive points to inward fecling, and supposes allenatel affection: when we ask forgiveness we primarily scek the removal of anger. Pardon looks more to outward things or consequences, and is often applled to tritling matters, ns whelt we beg parion for interrmpting a dian, or for jostling him in a crowd. The clvil masistrate also grants a parton, and not forgite ness. The two whrds are, therefore, very clearly distinmulshed from each other in most cases which relnto to the common conecrns of life.
