Prne tírinn (tish/an), \(n\). One who is, by practice,
acquainted with, or skilled in, agy thing.

TF There is no reason why the noun and verb should not both be spelled with \(c\), as in notice, sacrifice, apprent sylable, The distinction in spelling butween the noun and the vert properly belongs only to words which nre accented on the last syllable, as device and derise, where the verth has the sound of \(i z e\). The speling: practise tends to give it the same sound, as we see in meducated persans; and, hence, it is desirable fo follow the regilar analogy, and write the noun and yerb alike.
