names，either as one which they courted for the reason mentioned abore，or as one given them in sport，for the supposed exhibition of inflated feeling in entering on their new honors．The term，thus applied，seems to hav passed，at a very early period，from cambinge in ring aupeliation to f＇reshman，＂and thins to liare heen attached alpelation to fresnman，and the scond of the four classes in our American colleges to the sceond of the four classes in our American cotleges： while it has now almost ceased to the parent institution in England，from wheuce it came．This derivation of the word is rendered more probable by the fact that the early spelling was．to a great exteut at least，sophimore，as appears from the manuseripts of l＇resident Stiles，of Inle College，and the records of Harvard College down to the pertod of the － m merican revolution．This would be perfectly matural it Soph or Sophister was considered as the Lasis of the word，but ean hardy he explained it the ordinary derivia－
